Elko Substation

Dominion Energy is committed to keeping you informed of work in your community. As part of our Grid Transformation Plan to modernize the electric grid, upgrades are planned at Elko Substation, located off Portugee Road in Sandston, Virginia.

SCAN HERE TO LEARN MORE

To protect electric infrastructure and ensure reliable service for our customers, the existing fence will be replaced. The new, chain link security fence will be 8 feet tall topped with 1 foot of barbed wire.

Additional security technologies will also be installed to better deter, detect, delay, and monitor potential threats. The work includes expanding the existing substation on the eastern and southern sides on property owned by Dominion Energy.

Work inside the substation is expected to begin early 2027 and will last for approximately nine months, pending any permitting or weather delays. There are no anticipated interruptions to your electric service due to this project. Thank you for your patience as we work to increase the safety and reliability of your electric service.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
