

SQUIRRELS SOLAR

City of Richmond – Diamond District

PROJECT OVERVIEW

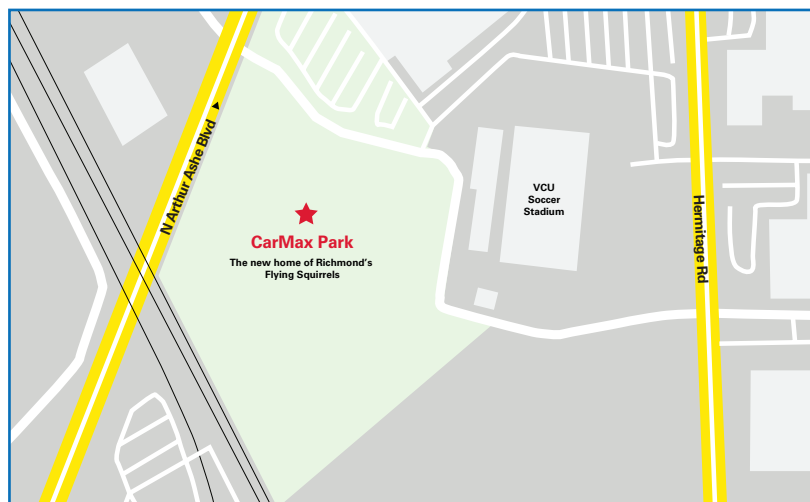

Dominion Energy plans to construct, own, and operate a roughly 1MW rooftop and carport solar facility at the Flying Squirrels' new stadium, CarMax Park, in the heart of Richmond's Diamond District.

The Squirrels Solar project not only illustrates the wonderful pairing of clean energy and baseball but also demonstrates Dominion Energy's commitment to providing affordable, reliable, and increasingly clean energy to our Richmond customers.

The project also supports the company's goal of using previously developed areas for generation projects.

The solar installation is expected to be among the largest in all of professional baseball.

PROJECT LOCATION AND TIMELINE

Location:

CarMax Park - New home of Richmond's Flying Squirrels

Current Status:

Awaiting state and local approvals

Construction:

2026

Operations:

2027
