To help maintain reliable service, a backup transformer will be installed within the existing substation footprint. This project is part of our Voltage Island Mitigation program under our Grid Transformation Plan.

The permitting process is currently underway, and construction activities are expected to occur from spring through winter of 2027. Updates will be provided as the project progresses. Thank you for your patience as electrical reliability is enhanced in your community.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
