Construction in your neighborhood

Carver Substation

At Dominion Energy, we are committed to keeping you informed of upcoming work in your community. You are receiving this postcard because we will soon begin construction at our Carver Substation off West Moore Street in Richmond's Carver neighborhood.

MORE

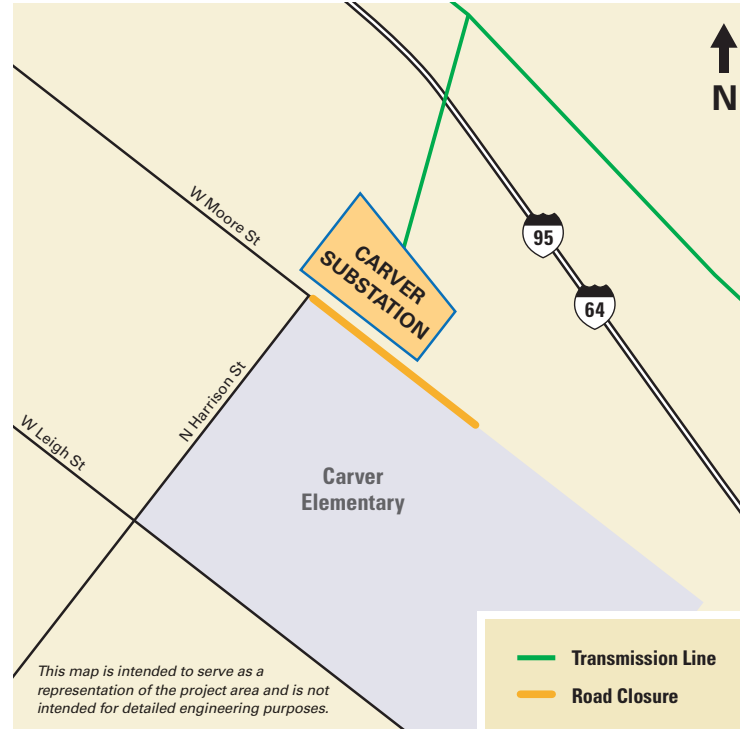

To protect electric infrastructure and ensure reliable service for our customers, we plan to replace the existing chain link and barbed wire fence at Carver Substation. A taller fence with new security technologies will be installed to better deter, monitor, and detect potential threats. We will also build a new retaining wall at the rear of the station, facing the highway.

Construction inside the substation began in late July 2024. The exterior fence replacement work is scheduled to last from early fall 2024 through spring 2025. The portion

of West Moore Street east of the North Harrison Street intersection will be closed beginning later in August for the duration of construction. We do not anticipate any interruptions to your electric service as a result of this project.

Thank you for your patience as we work on this important project to enhance safety and resiliency of the infrastructure that powers your every day.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

CARVER SUBSTATION CONSTRUCTION

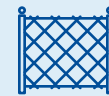

Construction from
July 2024 – spring 2025

•
Install new 12-foot fence
and security technologies

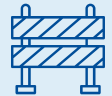

•
Temporary road closure at
