## Disputanta Substation Grid Transformation Project

Dominion Energy is updating grid infrastructure to better serve an evolving energy landscape. As part of our Grid Transformation Plan, Disputanta Substation in Prince George County, Virginia, will be modernized.

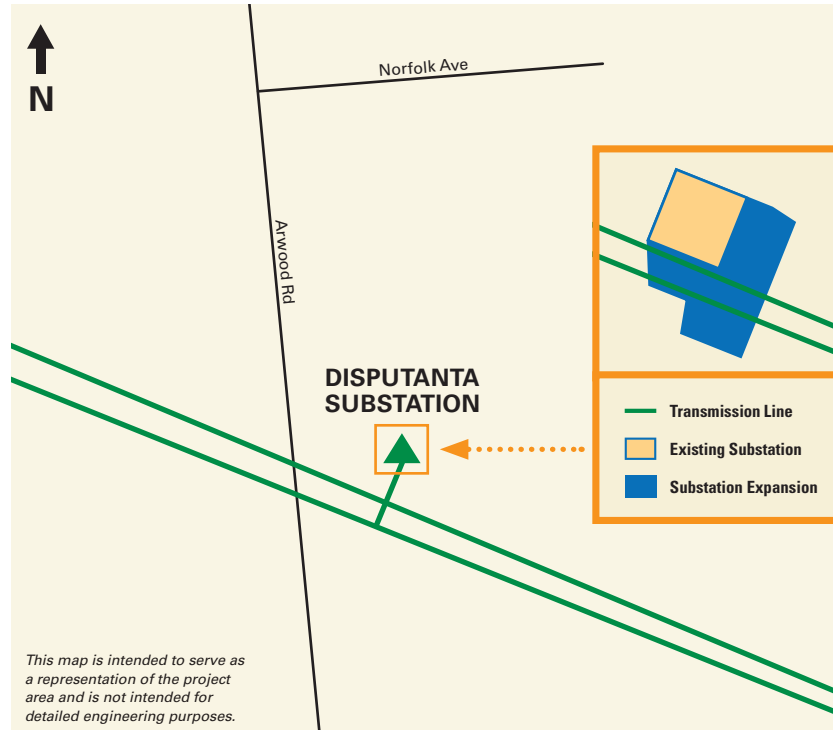

SCAN HERE  
TO LEARN  
MORE

To improve grid operations and to better integrate renewable energy resources, our team will replace aging equipment in the substation and deploy new technology. As part of this effort, the existing substation footprint will expand on property owned by Dominion Energy.

Permitting is in progress for the project. Construction is tentatively scheduled to take place from spring 2026 through end of year 2026. Your electric service should not be impacted as a result of this project. You will continue to receive updates as the project progresses

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at [powerlines101.dominionenergy.com](https://powerlines101.dominionenergy.com).
