Gretna Substation Grid Transformation Project

At Dominion Energy, we are committed to keeping you informed of construction activities in your community.

You are receiving this postcard because we want to update you on our progress at Gretna Substation in Pittsylvania County, Virginia. This work is part of our Grid Transformation Plan and will serve to mitigate a voltage island through substation expansion and addition of a transformer.

MORE

Construction began in spring 2024 with the partial removal of an outbuilding on Dominion Energy property. Crews have started expanding the substation and installing new equipment. We expect this work to continue through the end of 2024. There will be increased activity in the immediate area during construction.

We appreciate your patience as we work to provide the reliable, affordable, and increasingly clean energy that powers your every day.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
