Mechanicsville Substation Grid Transformation Project

Dominion Energy is updating grid infrastructure to better serve an evolving energy landscape. Mechanicsville Substation in Henrico County, Virginia will be modernized as part of our Grid Transformation Plan.

TO LEARN
MORE

Our team is replacing aging equipment in the substation and deploying new technology to improve grid operations and renewable energy resource integration. This work will be performed within the existing substation fence and is scheduled for completion by early 2026.

During this time, you may observe additional construction activity and traffic along Mechanicsville Turnpike, but your electric service should not be impacted as a result of this project. Thank you for your patience during this work.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.
