Midlothian Substation Grid Transformation Project

Dominion Energy is committed to keeping you informed of upcoming work in your community. You are receiving this postcard because safety and security upgrades are planned at Midlothian Substation 34.5 located off Dry Bridge Road in Chesterfield County, Virginia. Please note, there will be no work occurring at Midlothian Substation 500.

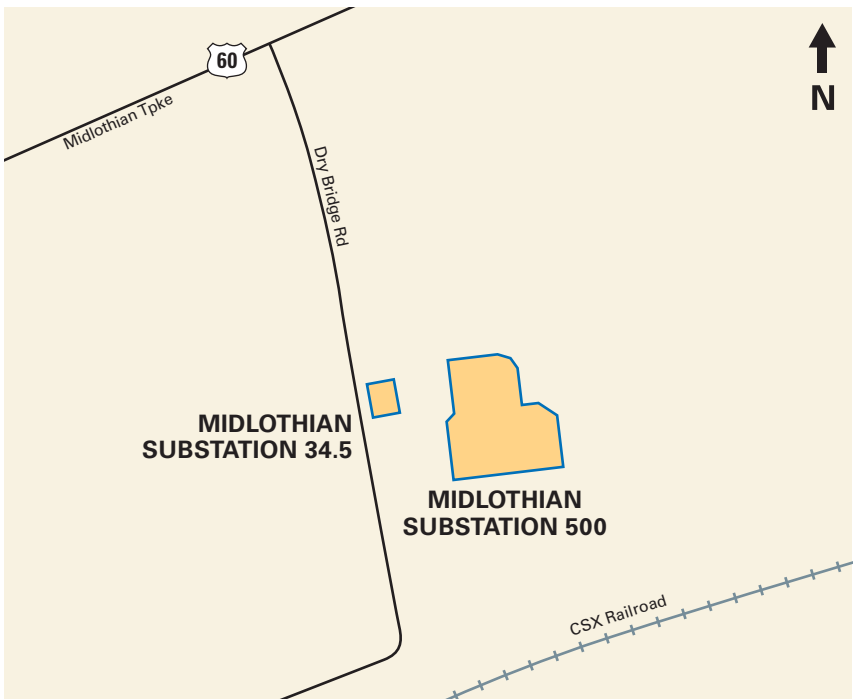

SCAN HERE TO LEARN MORE

As part of our Grid Transformation Plan to modernize the electric grid, Dominion Energy is upgrading security measures at existing substations. To protect electric infrastructure and ensure reliable service for our customers, the fence at Midlothian Substation 34.5 will be replaced with a chain-link security fence. The new fence will be eight feet tall with 1 foot of barbed wire.

Construction inside the substation will begin early November 2026, and fence work will begin in early 2027. Work at the substation will last about six months, pending any weather or permitting delays. There will not be any interruptions to your electric service as a result of this project.

Thank you for your patience as Dominion Energy works to increase the safety and reliability of your electric service.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.
