This project, which is part of our Grid Transformation Plan, will protect electric infrastructure and ensure reliable service for customers like you. As part of the project, new technologies will be installed to better deter, detect, delay, and monitor potential threats.

Construction inside the substation is scheduled to last through January 2026. Once all permits and approvals are received, fence construction will begin and will last approximately six months. Your electric service should not be interrupted as a result of this work.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

SECURITY UPGRADES

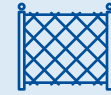

Install new security technology

Temporary construction and
vegetation impacts

Replace existing security fence
