Pendleton Substation Security Upgrades

Dominion Energy is committed to keeping you informed of upcoming work in your community. You are receiving this postcard to update you on a security project. As part of our Grid Transformation Plan, safety and security measures will be upgraded at Virginia Beach's Pendleton Substation.

MORE

To protect electric infrastructure and ensure reliable service for customers like you, the existing chain link fence topped with barbed wire will be replaced with a taller fence without barbed wire. Additional security technologies will also be installed to better deter, detect, delay, and monitor potential threats. During construction, a temporary fence will be installed, which may impact some of the existing vegetation onsite.

Construction was originally scheduled to begin this summer but has been delayed as our team works through permitting requirements. Construction is tentatively scheduled to begin in late 2025 or early 2026. You will continue to receive updates as the project progresses.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
