Work is occurring in your community

Plaza Substation

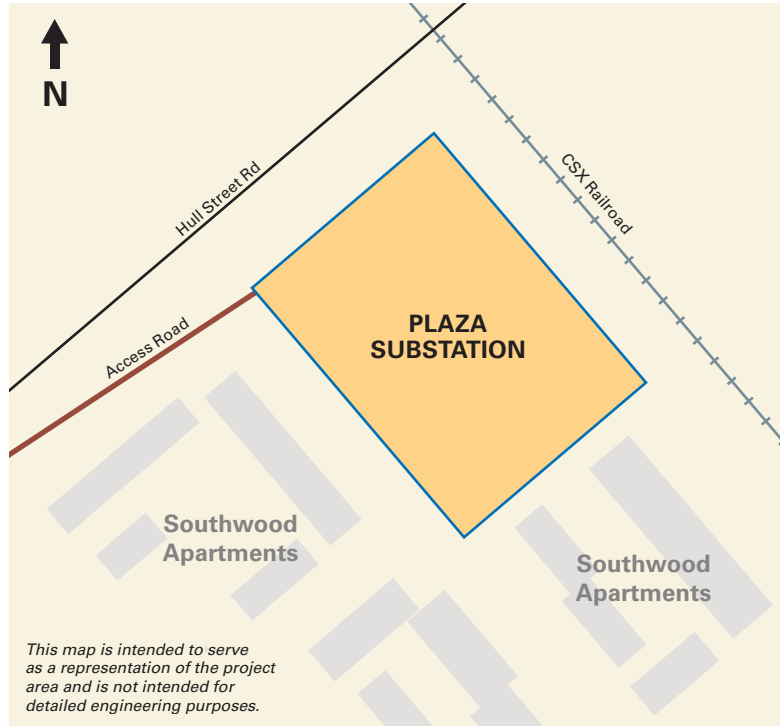

Dominion Energy is committed to keeping you informed of work in your community. As part of our Grid Transformation Plan and to ensure you continue to have reliable service, Plaza Substation is scheduled to have new security measures installed. This work includes replacing the fence and installing additional security technologies. These upgrades will help mitigate emerging threats to the energy sector and protect from cyber and physical attacks. Construction is expected to begin in fall 2026 and last for approximately six months, pending any permitting or weather delays. There are no anticipated interruptions to your electric service due to this project.

Thank you for your patience as we work to increase the safety and reliability of your electric service.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
