Investing in Our Communities

Dominion Energy image. Not project specific.

We are improving reliability in your community

Thalia Substation Security Fence

Dominion Energy is committed to keeping you informed of upcoming work in your community. Soon, Thalia Substation in Virginia Beach will be upgraded as part of our Grid Transformation Plan.

To protect electric infrastructure and ensure reliable service for customers like you, the existing chain

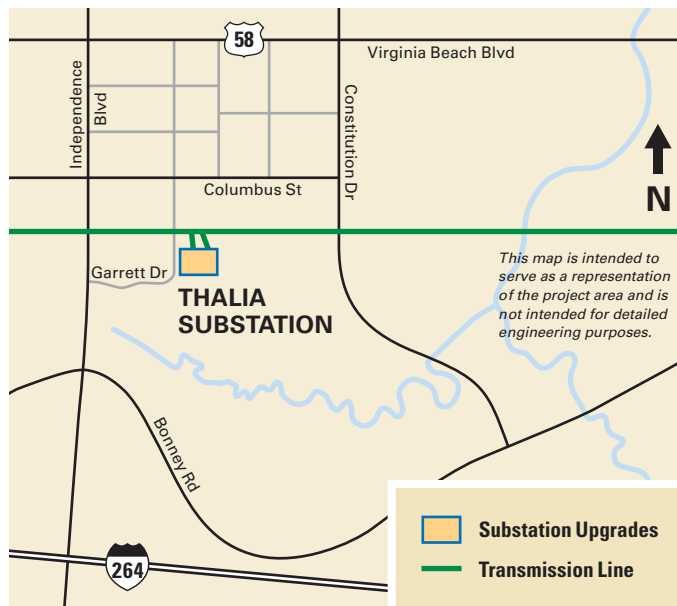

link fence topped with barbed wire will be replaced with a taller fence without barbed wire. Additional security technologies will also be installed to better deter, detect, delay, and monitor potential threats. Finally, a sidewalk will be installed between Thalia Substation and Garrett Drive.

Construction inside the substation will begin soon, followed by fence and sidewalk construction once all permits and approvals are received. This work will last for approximately six months, and your electric service should not be interrupted as a result of this project.

Thank you for your patience during this important project.
