MORE

This project will install a taller security fence without barbed wire. Additional security technologies will also be installed to better deter, detect, delay, and monitor potential threats. Construction is expected to begin in the late summer of 2026 and will last approximately eight months. You may experience periodic lane closures along Garrett Drive during this time. We do not anticipate any interruption to your electric service during construction.

Your patience and understanding is appreciated.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

SECURITY UPGRADES

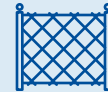

Install new security technology

• Replace existing security fence

• Temporary construction and vegetation impacts
