Construction update in your community

Vienna Substation Grid Transformation Project

Dominion Energy is committed to providing the latest information on projects in the communities we serve

In January 2025, we announced a project to modernize equipment at our Vienna Substation located off Center Street S, in Fairfax, Virginia. This work is part of our Grid Transformation Plan, which supports integration of renewable energy resources onto the electric grid.

MORE

While our teams are working diligently, there have been some unexpected delays. Construction is now scheduled to begin in fall 2026. Your patience is greatly appreciated as we work to start this project.

Construction at the Vienna Substation is scheduled to last for approximately 12 months and your electric service will not be impacted as a result of this work.

Protecting the grid against natural and man-made acts is a top priority.

You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
