We are doing work in your community

Westcott Substation Grid Transformation Project

At Dominion Energy, we are committed to keeping you informed of construction activities in your community. You are receiving this postcard because we are preparing to begin construction at Westcott Substation off Rose Lane in Falls Church, Virginia. This work is part of our Grid Transformation plan, which will modernize electric infrastructure and support integration of renewable energy resources onto the electric grid.

MORE

Beginning in spring 2024 (pending final permit approvals), crews will upgrade equipment, install new technology, and expand a portion of the fenced station area by approximately 57 by 70 feet. There will be increased construction and foot traffic in the area until the project is completed in fall 2025.

We will keep the community informed with periodic updates and signage along the trail. We will be mindful of our presence in your neighborhood and will work to mitigate construction impacts.

We appreciate your patience as we work to complete this important project.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
