

# Dominion Energy Environmental Policy Statement

## Policy

Dominion Energy is fully committed to providing reliable, affordable, and increasingly clean energy in an environmentally responsible manner that works to protect public health, the environment, and natural and cultural resources. This includes complying with applicable federal, state, and local environmental statutes, regulations, enforceable agreements, and permits; minimizing risks to the environment from unplanned or unauthorized release of hazardous or harmful contaminants; and striving for continuous improvement in our environmental performance. We aim to do what is right for the communities we serve and act consistently with our core values by meeting or going beyond environmental requirements in accordance with the following principles:

### Environmental Compliance, Sustainability and Accountability

- A. Pursue enhanced environmental performance, including our sustainability initiatives, independent of federal or state requirements.
- B. Consider public and local community input in our decision-making processes during planning, design, construction, and operations.
- C. Evaluate environmental risks and develop plans to minimize or mitigate impacts, including, but not limited to, climate-related risks.
- D. Commit sufficient resources to accomplish effective environmental and sustainability programs.
- E. Educate and set expectations for employees and contractors to be accountable for environmental compliance and stewardship.

### Manage Environmental Effects

- A. Minimize environmental effects caused by our operations while prioritizing safety, reliability, and affordability, which includes fostering innovation and supporting research and development.
- B. Promote the efficient use of energy and natural resources through employment of solutions and technologies that enable conservation, support energy management programs, and minimize impacts to water resources.
- C. Safeguard the proper handling and disposal of waste materials and seek to minimize waste creation through reuse and recycling opportunities.
- D. Implement sound environmental practices to protect wildlife, conserve habitats, and advance biodiversity.

### Open Communication and Transparency

- A. Screen major infrastructure projects for environmental justice, early in the planning process, to identify potentially vulnerable communities and develop proactive, inclusive community engagement strategies.
- B. Participate in framing responsible environmental laws, regulations, and standards affecting our operations, communities, and the workplace.
- C. Continuously improve engagement, communication, and transparency on environmental and sustainability matters.

### Continuous Improvement and Values

- A. Maintain and utilize the company-wide Environmental Management System (EMS) to evaluate, manage, track, and continuously improve environmental performance.
- B. Employ the EMS to establish and promote a culture of environmental compliance, awareness, and stewardship consistent with our core values and this Dominion Energy Environmental Policy Statement.
