Local Power Line Project Information

Allman Substation 230 kV Transmission Project

At Dominion Energy, we are dedicated to providing safe and reliable electric service to your community. You are receiving this postcard to let you know that new transmission infrastructure is proposed in the City of Fredericksburg, Virginia. This project will include building a new substation, Allman Substation, and associated transmission structures.

MORE

Dominion Energy will continue to modernize this corridor as this work will be located within the same path as the Fredericksburg to Possum-Point 230 kilovolt (kV) Electric Transmission Project. The Allman Substation Project does require review by the Virginia State Corporation Commission (SCC), and the application is tentatively scheduled to be filed in May 2026.

To learn more about the SCC process and this project, you are invited to attend our open house meeting. There, you are welcome to ask the project team questions about the timeline and benefits.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
