Burrell 230 kV Substation Electric Transmission Project

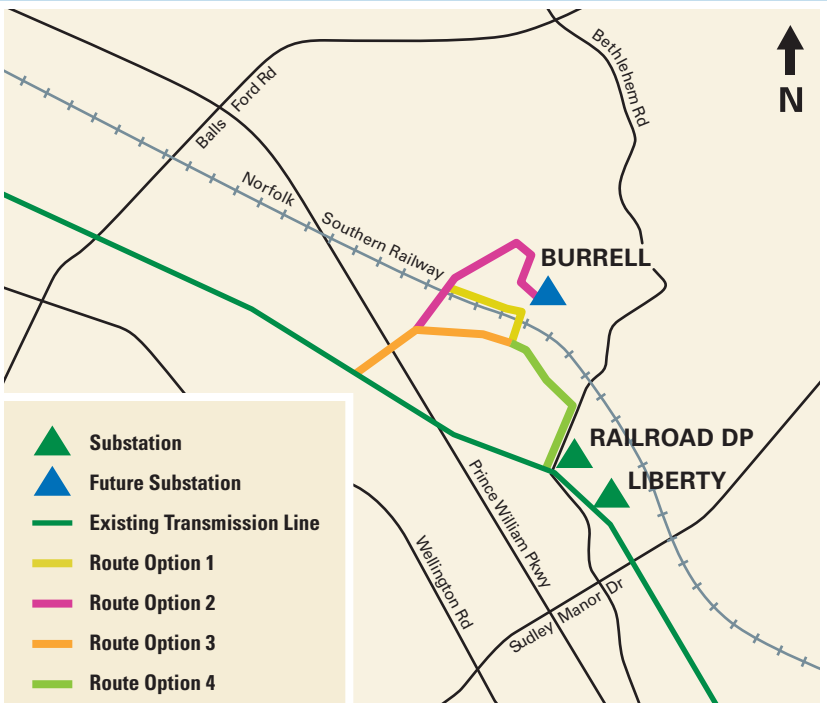

As Prince William County continues to grow, so does the need for reliable electricity. Dominion Energy is planning the Burrell Substation 230 kilovolt (kV) Electric Transmission Project to help meet growing demand and maintain the reliable service you depend on.

SCAN HERE TO LEARN MORE

The project would connect the existing electric grid to a new NOVEC-owned substation supporting a planned data center campus. It would also strengthen the transmission system serving you and your community while helping maintain mandatory grid reliability standards as electricity demand grows.

The project includes approximately 0.6 miles of new overhead transmission line and would need a 100 foot wide right of way to safely accommodate the proposed transmission facilities. Dominion Energy would also construct and operate the 230 kV transmission side of the NOVEC-owned substation. The required permits for the substation have been approved by Prince William County.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

MEETING DETAILS

Wednesday, December 2, 2026
5:30 p.m. – 7:30 p.m.

Gainesville High School
13150 University Blvd.
Gainesville, VA 20155

No formal presentation will occur. You are welcome to attend any time during the meeting window.
