## Burton-Virginia Beach 115 kV Transmission Line Rebuild Project – Phase 3

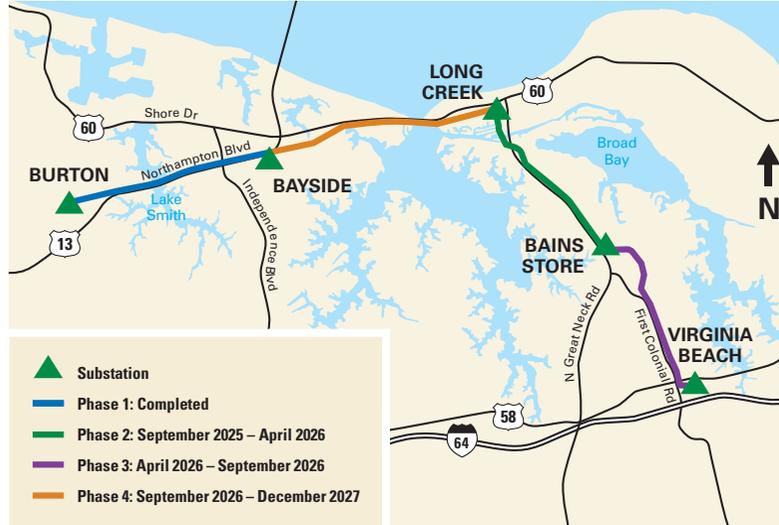

Dominion Energy is committed to providing the reliable, affordable, and increasingly clean energy that powers your every day. To replace aging equipment and maintain reliable service for our customers, we have begun rebuilding an 115 kilovolt (kV) electric transmission line that runs from Burton Substation through Bayside Substation, Bains Store Substation, and ends at Virginia Beach Substation.

Phase 1 of the project has been completed, and Phase 2 is approaching completion. Phase 3, which covers the segment from Bains Store Substation to the Virginia Beach Substation, is scheduled to begin preconstruction activities in late March 2026, with construction beginning in April 2026.

During preconstruction activities, our crews will be in and around the right-of-way marking the locations for new structures. Construction materials will be staged and construction entrances will be installed.

To learn more about Phase 3 of this project, you are invited to a virtual community meeting. You will have the opportunity to have your questions answered by our project team.

Dominion Energy is dedicated to working safely and courteously in your community. Thank you for your patience while this important reliability project is completed.
