Burton-Virginia Beach 115 kV Transmission Line Rebuild Project – Phase 2 and 3

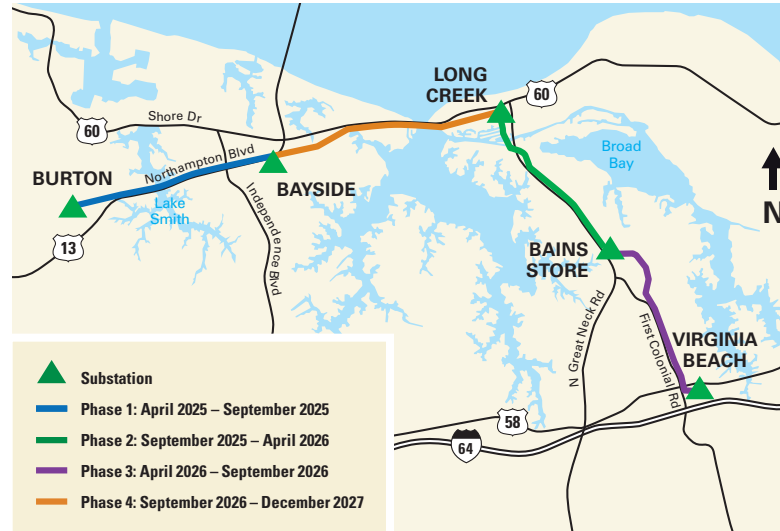

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers your every day. To maintain reliable service for our customers, we have begun rebuilding an existing 115 kilovolt (kV) electric transmission line starting from our Burton Substation through our Bayside Substation, Long Creek Substation, Bains Store Substation, and ending at our Virginia Beach Substation.

Phase 1 of this project began in April 2025. Phase 2 preconstruction activities will start in August 2025 and construction will begin in September 2025. Phase 3 preconstruction activities are scheduled to begin in early Spring 2026 with construction starting late Spring 2026.

During preconstruction activities, our crews will be in and around the right-of-way marking where new structures will be placed. We will also stage materials and install construction entrances.

To learn more about Phase 2 and 3 of this project, we invite you to join us for an open house community meeting. You will have the opportunity to learn details about the project and have your questions answered by our project team.

We are dedicated to working safely and courteously in your community. Thank you for your patience while we complete this important reliability project.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

OPEN HOUSE COMMUNITY MEETING

Meet the project team

Wednesday, July 9, 2025,
5:30 p.m. to 7:30 p.m.

Eastern Shore Episcopal Church
2020 Laskin Road
Virginia Beach, VA 23454
