Spring community meetings are scheduled for you

Carson – Midlothian & North Anna – Midlothian 500kV Electric Transmission Rebuild Projects

At Dominion Energy, we provide the reliable, affordable, and increasingly clean energy that powers your every day. You are receiving this postcard to invite you to community meetings this spring. These meetings are an opportunity to learn more about proposed infrastructure upgrades in your community that will ensure grid reliability for you and your neighbors.

This proposed project will rebuild the existing 500 kilovolt (kV) electric transmission lines in the existing right of way corridor between our Carson, Midlothian, and North Anna substations. Our team is still early in the process of designing the transmission lines, and an application will be filed with the State Corporation Commission (SCC) in August 2026. At the meetings, you can speak to the project team and ask questions about the new infrastructure.

Meeting details are listed here and posted on the project website. Thank you for your participation and patience as we prioritize this critical infrastructure in your community.
