**Carson – Midlothian & North Anna – Midlothian 500kV Electric Transmission
Rebuild Projects**

Dear Neighbor:

You may remember Dominion Energy proposes to rebuild the existing 500 kilovolt (kV) electric transmission lines between the Carson, Midlothian, and North Anna substations. These proposed infrastructure improvements will ensure power reliability for you for decades to come. Field surveying activities began in January 2026 and continue this spring. You are receiving this letter to remind you of important safety protocols for crews who may need to access the powerline corridor on your property.

Crews work in and near the right of way, on foot or in light duty vehicles. Care is taken to avoid livestock. Crews will use existing access routes which may be on or near your property. **Easement agreements with property owners grant Dominion Energy rights on your property. If you have questions about your easement, please contact the Right of Way Team by emailing ETROW@dominionenergy.com.**

Field teams wear high-visibility safety vests. If you or guests on your property hunt or use guns for sport near the transmission line right of way, please let them know Dominion Energy crews will be present. This will help ensure a safe working environment.

Surveyors may dig test holes, which are immediately refilled. They may leave yard stakes, small flags, or landscaping nails in the right of way. Please do not remove these important markers. Additional surveying may occur in 2026, and you may not be notified each time.

Crews will minimize disruptions to you as much as possible, and your cooperation is appreciated. To gather your important input, Dominion Energy has scheduled public community meetings. The meeting schedule, project timeline, and other project details are on our project website: DominionEnergy.com/Carson-NorthAnna. Thank you for your participation and patience as this critical infrastructure is prioritized in your community.

Sincerely,

The Electric Transmission Project Team
