Proposed Centreport 230 kV Electric Transmission Project

Dear Neighbor,

At Dominion Energy, we are dedicated to maintaining safe, reliable, affordable, and secure electric service to the communities we serve. You are receiving this letter because we are currently planning for new electric transmission infrastructure in your area.

Stafford County is experiencing growing energy demands as new business is developing in the area. To address this growth, new electric infrastructure is needed to meet the new power needs, maintain federal reliability rules, and keep the grid operating efficiently.

The Centreport project proposes a new substation, located on Centreport Parkway, and an associated double-circuit 230 kilovolt (kV) electric transmission line. We are currently in the planning stages of the project; our team is reviewing all electrical and construction options. No routes have been finalized. However, a study area is under consideration.

Enclosed, you will find an overview map with the substation location and study area, along with a fact sheet. While multiple routes will be evaluated, one proposed route with alternatives will be submitted to the Virginia State Corporation Commission (SCC) for final evaluation and approval.

Public engagement is a key part of the project planning process. We want to ensure our team listens to community feedback to ensure the routing options incorporate community perspective prior to filing an application with the SCC. We invite you to join us at an upcoming community meeting at The Rowser Building on April 23, 2024, where we will review the project need, routing details, gather feedback, and answer your questions.

More information will be provided in the coming weeks. In the meantime, we encourage you to view more information about the project on our website, [DominionEnergy.com/centreport](https://www.dominionenergy.com/centreport). You can also contact our project team by email at powerline@dominionenergy.com or by phone at 888-291-0190.

Thank you for your understanding while we plan for long-term reliability investments in your community.

Sincerely,

The Electric Transmission Project Team
