Chase City to Cloud 230 kV Electric Transmission Project

AT DOMINION ENERGY, we are committed to providing safe, reliable, and affordable electricity to the communities we serve. You are receiving this postcard because we want to share an update on our Chase City to Cloud 230 kilovolt (kV) Electric Transmission Project.

In October 2022, you will see our crews conducting survey work along the right of way. This survey work is in preparation for the start of construction activity in the first quarter of 2023.

The project will add two new 230-kV electric transmission lines along an existing 15-mile existing corridor in Mecklenburg County. The project will build the proposed two new 230-kV lines next to the current 115-kV line, accommodating economic growth and meeting data center demand.

AT DOMINION ENERGY, protecting the grid and making it secure against natural and man-made acts is a top priority. We work alongside government officials to prepare for potential incidents that could affect our ability to provide electricity safely and reliably to the communities we serve. Learn how we're keeping you safe at powerlines101.dominionenergy.com.
