Title: Registered Tank Facilities

Date: 2/13/2019

Memo

To:	Amanda Mayhew Dominion Energy 10900 Nuckols Road, 4th Floor Glen Allen, Virginia 23060	From:	Corey Gray 5209 Center Street Williamsburg, Virginia 23188
File:	203401247	Date:	February 22, 2019

Reference: Threatened and Endangered Species Review for the Chesterfield – Tyler 230 kV Partial Rebuild Project

Stantec conducted database searches for potential federally and state listed threatened and endangered species in the vicinity of the proposed Lines 205 and 2003 Chesterfield – Tyler 230 kV Partial Rebuild Project. The rebuild project consists of an approximately 2.5-mile section of Lines 205 and 2003 which are collocated on lattice structures. Both 230 kV transmission lines extend south from the Chesterfield Power Station in Chesterfield, Virginia to the Tyler Substation. The project will take place within the existing, cleared transmission line right-of-way (ROW), although additional maintenance within the existing ROW easement may be required. The online database searches included the following:

- U.S Fish & Wildlife (USFWS) Information, Planning, and Conservation (IPaC)
- USFWS Critical Habitat for Threatened and Endangered Species Mapper
- USFWS Bald Eagle Concentration Area Map
- Department of Game and Inland Fisheries (DGIF) Virginia Fish and Wildlife Information Service (VAFWIS)
- DGIF Northern Long-eared Bat (NLEB) Winter Habitat and Roost Trees Map
- DGIF Tri-colored bat and Little Brown Bat Hibernacula
- Virginia Department of Conservation and Recreation (DCR) Natural Heritage Data Explorer (NHDE)
- Center for Conservation Biology (CCB) Eagle Nest Locator for Virginia
- CCB Colonial Waterbirds 2013

Results

Table 1. Database Search Results

Species	Status	Database	Results
Northern long-eared bat <i>Myotis septentrionalis</i>	FT ST	USFWS	No hibernacula or maternal roost trees were identified in the vicinity of the project.
Tri-colored bat <i>Perimyotis subflavus</i>	SE	VAFWIS	Observations north of Chesterfield Power Station. No hibernacula identified in the vicinity of the project.
Atlantic sturgeon <i>Acipenser oxyrinchus</i>	FE SE	VAFWIS NMFS	The lower James River is suitable habitat for this species and has been designated as critical habitat.
Sensitive joint vetch <i>Aeschynomene virginica</i>	FT ST	USFWS DCR	Identified as potentially occurring in the vicinity of the project.
Bald eagle <i>Haliaeetus leucocephalus</i>	Protected	CCB	No nests were identified within 660 feet of the project.
Great blue heron <i>Ardea herodias</i>	Protected	CCB	One great blue heron colony approximately 0.5-mile northwest of project

FT: federally threatened, FE: federally endangered, ST: state threatened, SE: state endangered

February 22, 2019

Page 2 of 2

Reference: Threatened and Endangered Species Review

Conclusion

DGIF identified the lower James River as potential anadromous fish use areas with a time-of-year restriction (TOYR) for in-stream work from February 15 – June 30. Additionally, the National Marine Fisheries Service has designated the main stem of the James River as critical habitat for the Atlantic sturgeon. There is no instream work proposed in the river or tidal tributaries, and as such, the project is not expected to adversely affect the Atlantic sturgeon or need to adhere to the TOYR.

USFWS and DCR have identified the federally and state threatened sensitive joint-vetch (SJV) as potentially occurring within the project area. SJV prefers fresh to slightly brackish tidal marshes in the mid-Atlantic. No tidal marsh is present within the project area; therefore, SJV would not occur within the project area.

The federally and state threatened northern long-eared bat has been identified by USFWS as potentially occurring within the proposed partial rebuild project. However, DGIF records indicate that no known hibernacula or maternity roost trees occur within the vicinity. The partial rebuild project will occur within an existing maintained ROW and tree removal is anticipated to be limited to danger trees and limbing. During the Section 404 Clean Water Act permitting, the project is expected to rely on the findings of the 4 (d) rule with a TOYR for tree clearing of June 1- July 31. The tri-colored bat was identified north of the project area. Since there are no known hibernacula in the project vicinity, no adverse effects are expected.

According to the 2013 colonial waterbird survey, one great blue heron colony is located northwest of the Chesterfield Power Station and within 0.5 mile of the project. Due to the presence of the existing power station between the colony and the project, no impacts are expected to occur to the colony. The complete results from the database searches are attached for your reference.

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*). Any activity proposed on National Wildlife Refuge lands must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered

species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF>

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the wind energy guidelines (<http://www.fws.gov/windenergy/>) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm>; <http://www.towerkill.com>; and <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Event Code: 05E2VA00-2019-E-04714

Project Name: Chesterfield-Tyler 230kV Partial Rebuild

Project Type: TRANSMISSION LINE

Project Description: Transmission line partial rebuild.

Project Location:

Approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/place/37.36607962836631N77.39430295774388W>

Counties: Chesterfield, VA

Endangered Species Act Species

There is a total of 2 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

-
1. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Mammals

NAME	STATUS
Northern Long-eared Bat <i>Myotis septentrionalis</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/9045	Threatened

Flowering Plants

NAME	STATUS
Sensitive Joint-vetch <i>Aeschynomene virginica</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/855	Threatened

Critical habitats

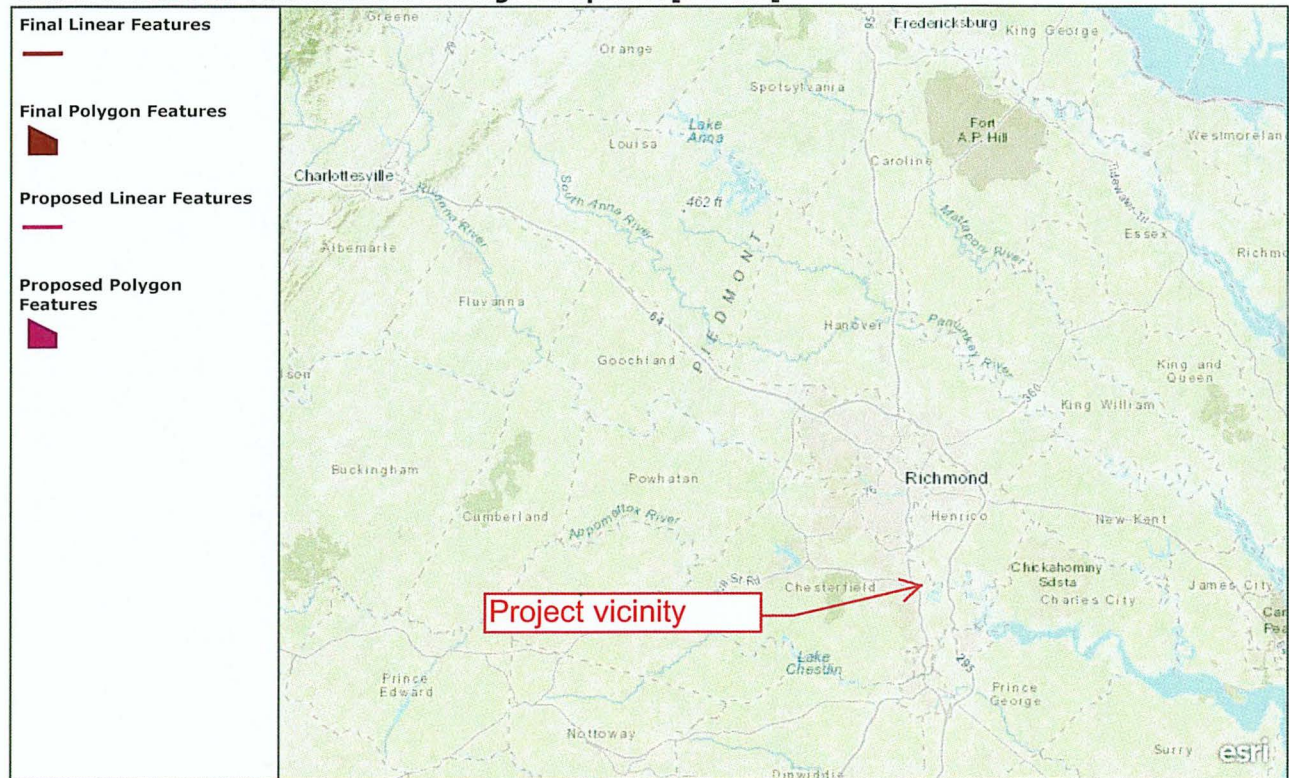

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

USFWS National Wildlife Refuge Lands And Fish Hatcheries

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

Critical Habitat for Threatened & Endangered Species [USFWS]

A specific geographic area(s) that contains features essential for the conservation of a threatened or endangered species and that may require special management and protection.
