We are doing work in your community

Clark-Idylwood Electric Transmission Reconductor Project

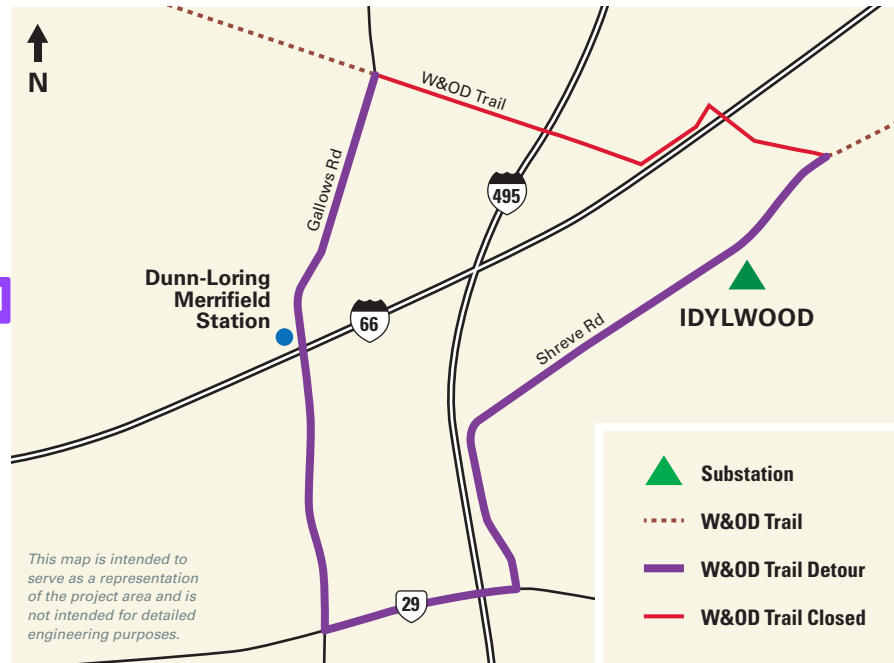

At Dominion Energy, we are committed to sharing information on projects in the communities we serve. To meet the area's growing energy needs, we are replacing the wires, or reconductoring, a four-mile transmission line between Clark and Idylwood substations in Fairfax County, Virginia. We are preparing to begin Phase II of our project, which will cover about one mile from Gallows Road to

Idylwood Substation on Shreve Road. Parts of this 230 kilovolt line parallels the Washington & Old Dominion (W&OD) Trail. For the safety of trail users and our crews, portions of the W&OD trail will be temporarily closed during this work. Directional signage for the VDOT-approved detour will be posted. We will also post detailed detour information on the project webpage as it becomes available.

Prior to construction activities, we are pursuing permits and coordinating with relevant agencies and localities. As we prepare for construction, you may notice our crews and contractors in the project area.
