# Join us for a Community Meeting

## Dooms-Charlottesville 230 kV Electric Transmission Rebuild Project

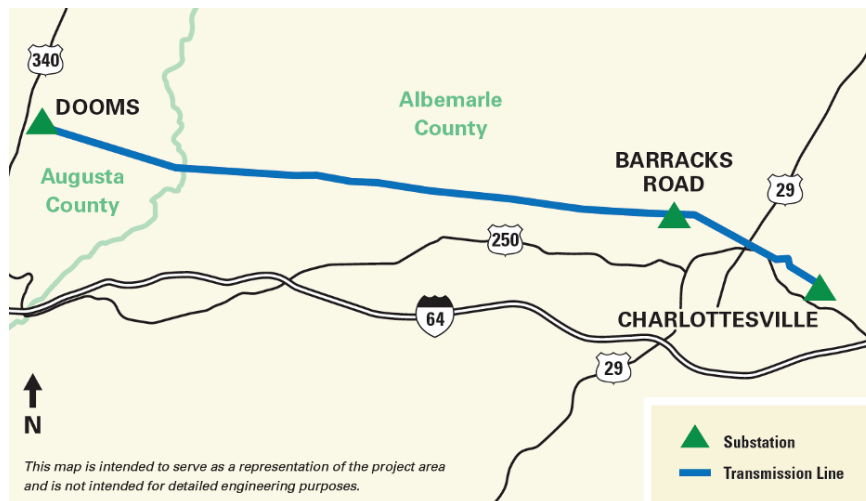

At Dominion Energy, we are committed to providing the reliable, affordable and increasingly clean energy that powers your every day. To replace aging equipment and maintain reliable service for our customers, a 230 kilovolt (kV) electric transmission line between our Dooms and Charlottesville substations needs to be rebuilt.

Dominion Energy will host two community meetings for you to learn more about this project. You are invited to join us for in-person meetings on either **October 7** or **October 8**. During these meetings, you will have the opportunity to have your questions answered by the project team.

Working safely and courteously in your community is a priority. Thank you for your patience throughout the planning of this important reliability project in your area.
