

Great Bridge Substation Electric Transmission Project City of Chesapeake, Virginia

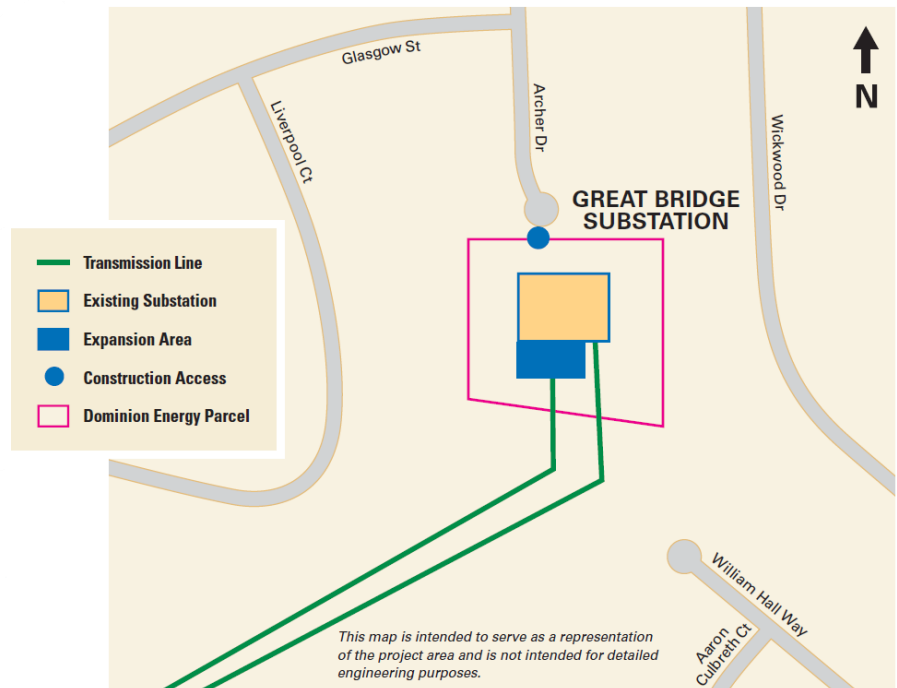

Upgrading the Great Bridge Substation will support future growth and reliability.

Dominion Energy plans to install new equipment at the Great Bridge Substation in Chesapeake, Virginia, to accommodate future load growth. The project will strengthen grid stability and improve system resiliency, and help ensure the continued delivery of safe, reliable, and affordable electric service to the community.

Fast Facts:

- The substation footprint and security fence will expand by approximately 0.1 acres on Dominion Energy-owned property.
- Improved reliability to the community and helps meet future load growth.
- Work may occur Monday through Saturday between 7:00 a.m. and dusk.

Anticipated Construction Timeline:

- August 2026 – Preconstruction activities begin.
- Fall 2026 – Construction begins.
- Spring 2027 – Anticipated construction completion.
