Construction Activities in Your Community

Great Bridge Substation

Dominion Energy is committed to letting you know about work near you. To ensure new power generation can reliably connect to the electric grid, new equipment will be installed at the existing Great Bridge Substation on Archer Drive Road, in Chesapeake, Virginia.

MORE

The substation footprint as well as the security fence will expand by approximately 0.1 acres on Dominion Energy-owned property. Equipment will be upgraded, and a new control enclosure will be installed. Construction is planned from August 2026 through spring 2027. Work may occur Monday through Saturday between 7:00 a.m. and dusk. During this time, you may notice increased construction traffic traveling through the Cheshire Forest neighborhood and on the existing driveway entrance from Archer Drive.

Thank you for your patience while our crews work to provide safe, reliable, and increasingly clean energy to you and your community.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
