Hornertown-Hathaway 230 kV Transmission Line Project Update

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers your every day. We would like to update you on work happening between our Hornertown and Hathaway substations.

Preconstruction activities are expected to begin in mid-May 2025, and construction is scheduled for mid-June 2025 through the end of 2026. Restoration activities will take place in 2027.

MORE

During this timeframe, you may notice our contractors in and around the right of way installing construction entrances and delivering equipment. These construction entrances should not impact local roadways. Since this is a new right of way, our forestry team will be clearing trees within the right of way as well as removing and trimming trees outside of the right of way that would be a danger to the transmission line.

Carolina-South Justice Branch is another active project in the area. Some construction activities have taken place in the same right of way corridor as the Hornertown-Hathaway project. The Carolina-South Justice Branch project's construction is scheduled to continue through 2025.

We are dedicated to working safely and courteously in your community. Thank you for your patience and understanding as we work to power your every day.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
