Upcoming construction in your community

Nimbus Substation and 230 kV Electric Transmission Line Project

At Dominion Energy, reliable, affordable, and increasingly clean energy is provided to power your every day. You are receiving this postcard because construction in eastern Loudoun County is scheduled to begin in early Fall 2025. This project will improve electric reliability for area customers.

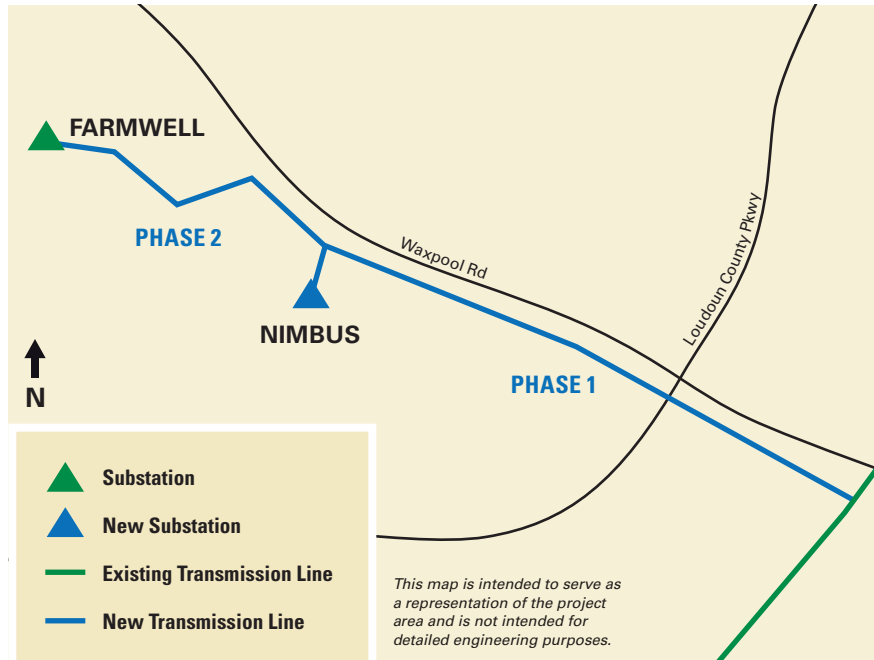

- **Fall 2025:** In preparation for construction, some tree removal will take place in September 2025.
- **January 2026:** Build a new double circuit 230 kilovolt (kV) electric transmission line to connect an existing transmission line to Nimbus Substation along the south side of Waxpool Road.
- **March 2026:** Build a new single circuit 230 kV electric transmission line that connects the existing Farmwell Substation to the new Nimbus Substation.

To maintain a safe work zone, there may be temporary traffic impacts on Loudoun County Parkway for two weekends in early April 2026 while we pull the transmission line over the road. To help you plan your travel, advance notice about any traffic impacts will be provided.

During construction, some sidewalks may be closed at times. Please observe pedestrian signage for your safety. You will receive updates on construction progress. Thank you for your patience and understanding as this important reliability project is completed.

Protecting the grid against natural and man-made acts is a top priority.
