Join us at our upcoming Community Meeting

Nokesville-Bristow 230 kV Electric Transmission Project

Last fall, Dominion Energy hosted a public open house to introduce the Nokesville-Bristow 230 kilovolt (kV) Electric Transmission Project and engage with you. Your feedback has helped us refine routing details, and your input continues to matter to this project.

MORE

As the Innovation Park area of Prince William County experiences rapid growth, this project will meet your current and future energy needs and help you continue to experience reliable service. You will benefit from this new infrastructure that will strengthen the electric power grid and help Virginia maintain nationally recognized reliability standards that you have come to depend on. As part of this proposed project, you will see a new transmission line that will connect the existing Nokesville Substation to the future Bristow Switching Station.

We invite you to attend our upcoming open house to hear project updates, ask questions, share feedback, and speak directly with members of the project team.

Additionally, you are invited to view current project information and submit feedback via our interactive mapping tool, Geovoice, on our project website:
www.dominionenergy.com/Nokesville.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

MEETING DETAILS

In-person Open House

Thursday, July 23, 2026

5:30PM - 7:30PM

Patriot High School

10504 Kettle Run Rd.

Nokesville, VA 20181

We look forward to your participation.
