Aviator to Takeoff 230 kV Electric Transmission and Substation Project

At Dominion Energy, we are committed to continually reviewing and analyzing our energy infrastructure to provide safe, reliable electricity to our neighbors. We are preparing to build the Aviator to Takeoff 230 kilovolt (kV) Electric Transmission and Substation Project and will submit the project to the Virginia State Corporation Commission (SCC) in 2024.

This project is comprised of three components:

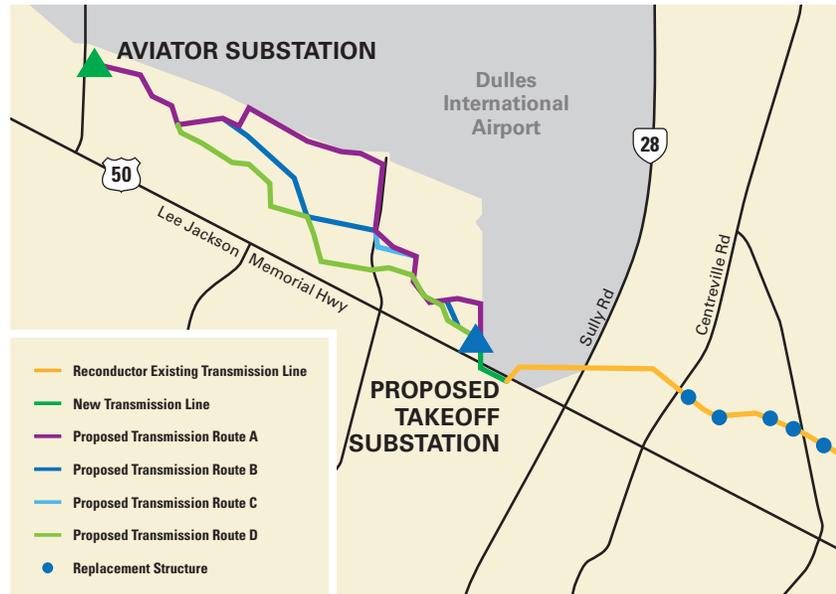

- A) Construct the new Takeoff Substation
- B) Construct a new double-circuit 230 kV line between Aviator and Takeoff substations
- C) Reconnector approximately 2 miles of existing 230 kV transmission lines

This project will address increased load demand in the area by expanding and upgrading the 230 kV transmission network around Chantilly, Virginia. This will improve electric grid reliability for all customers, enhance Dominion Energy's operational flexibility, and allow us to continue to comply with mandatory federal standards.

Consider joining us to learn more at our Community Meeting on Wednesday, October 25. You will be able to speak to the project team and ask them questions about the project. There will not be a formal presentation, so please feel free to stop by at your leisure between 5:30 p.m. and 7:30 p.m. Your continued involvement, participation, and input are important in developing these projects.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

MEETING DETAILS

Wednesday, October 25, 2023
5:30 p.m. – 7:30 p.m.

Rajdhani Mandir
4525 Pleasant Valley Rd,
Chantilly, VA 20151

*There is no formal presentation;
stop by anytime during the meeting.*
