Attend a Substation Open House

Golden 500 kV / 230 kV Substation Project

At Dominion Energy, we provide reliable, affordable, and increasingly clean energy that powers your everyday life. You expect reliable power, and the Golden 500 kV / 230 kV Substation Project will help meet the growing need for electricity in your community and support homes, businesses, schools, and facilities throughout the region.

TO LEARN
MORE

Following the Virginia State Corporation Commission's (SCC) approval of the Aspen-Golden 500 kV / 230 kV electric transmission project in February 2025, Dominion Energy is now working through the local permitting process with Loudoun County for Golden Substation.

In support of that process, you are invited to participate in two open houses where you will learn more about Golden Substation. The first meeting will be a virtual meeting on June 25 which will include a presentation and a Q&A session. The second meeting will be an in-person meeting on June 29 and will be "science-fair" style. While it will

not have a formal presentation, there will be visual simulations of the proposed Golden Substation and an opportunity to learn about next steps in the permitting process. Subject matter experts will be available to answer all of your project-related questions.

Meeting details are listed here and posted on the project website. Thank you for your participation and patience as we prioritize this critical infrastructure in your community.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
