Upcoming work in your community

Perkins Creek Solar Interconnection Project

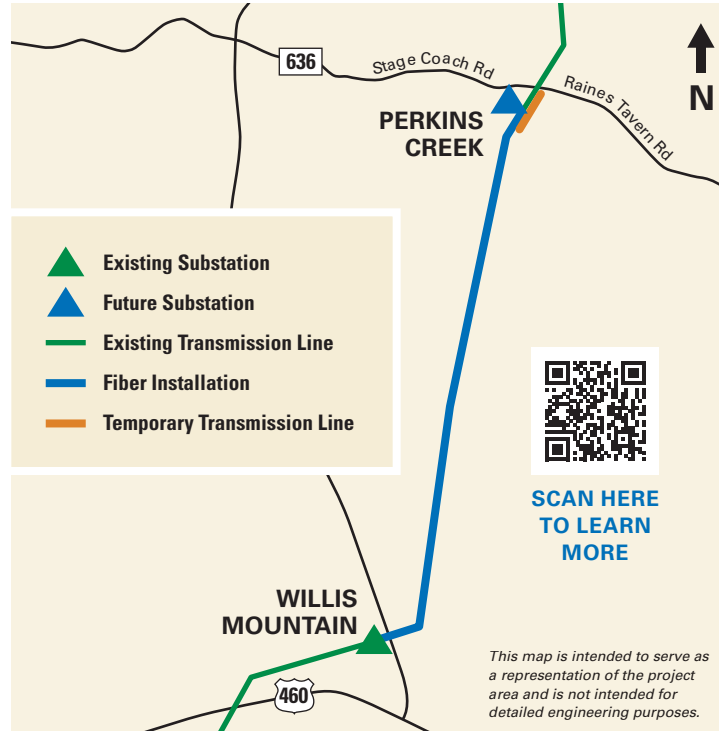

At Dominion Energy, we are committed to sharing information on upcoming projects in your area. You are receiving this postcard because a new substation and electric transmission line upgrades are coming to Buckingham, Cumberland, and Prince Edward counties.

This project connects RWE Renewables' Blue Rock Solar in Buckingham County to the electric grid and adds a new communication fiber for system protection and response. There are three main components of this project:

- build new Perkins Creek Substation within RWE Renewables' Blue Rock Solar facility in Buckingham County
- build a temporary transmission line outside Perkins Creek Substation that will require approximately 10 feet of new right of way (approximately 0.3 miles)
- install new structures and a new fiber communication line within the existing right of way between future Perkins Creek Substation in Buckingham County and Willis Mountain Substation in Prince Edward County (approximately 4.6 miles)

Permitting is in progress, and construction activities will begin late this year. Thank you for your patience during this important project.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
