Upcoming work in your community

Perkins Creek Solar Interconnection Project

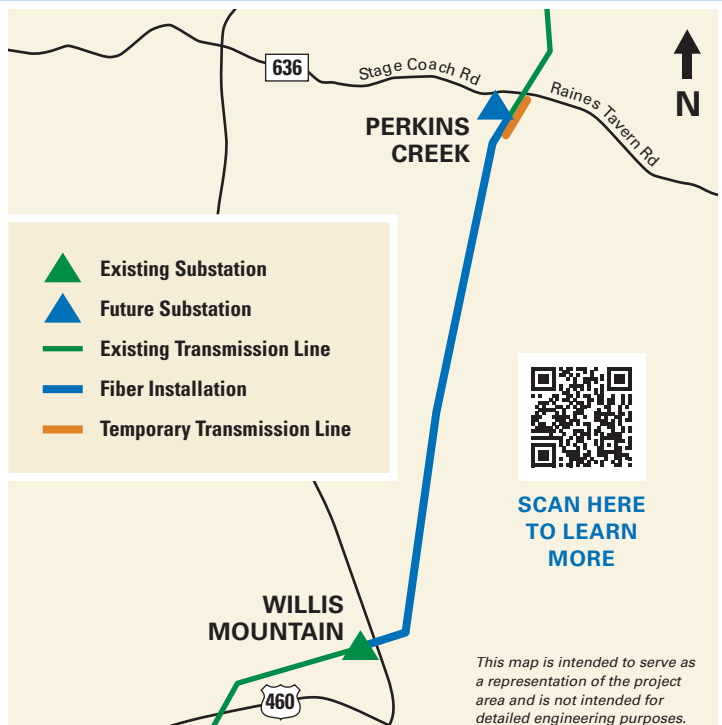

At Dominion Energy, we are committed to sharing information on upcoming projects in your area. You are receiving this postcard because a new substation and enhanced electric transmission infrastructure is being constructed in Buckingham, Cumberland, and Prince Edward counties.

This project will connect RWE Renewables' Blue Rock Solar in Buckingham County to the electric grid and add a new communication fiber for system protection and response.

Late this year, crews will install temporary construction access roads along the electric transmission right of way. They will also remove vegetation which may interfere with transmission infrastructure. Early next year, a temporary transmission line will be installed near Perkins Creek Substation, and new structures will be installed within the existing right of way from Perkins Creek Substation to Willis Mountain Substation to support new communication fiber. In spring 2026, substation construction will begin at Perkins Creek.

Thank you for your patience during this important project.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

CONSTRUCTION TIMELINE

Late 2025: Construction access and forestry activities begin

•

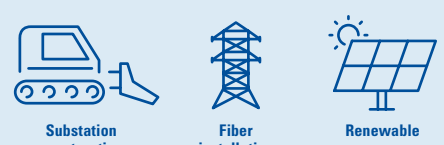

Early 2026: Temporary transmission and fiber line construction begins

•

Spring 2026: Substation construction begins

•

Fall 2026: Estimated construction completion
