Working in your community

Rockbridge to Buena Vista

At Dominion Energy, we are committed to providing the latest information on activities in your community. You are receiving this postcard because approximately 6 miles of the 115 kilovolt (kV) electric transmission line spanning Rockbridge County and Buena Vista, Virginia, need to be rebuilt. The existing wooden H-Frame structures will be replaced with weathering steel H-Frame structures. The transmission infrastructure has been in operation for over five decades and updating this equipment will help maintain safe and reliable electric service. This work will occur within the existing right of way corridor; therefore, no new right of way is required.

MORE

Starting in late May 2026, Dominion Energy crews and contractors will be in the right of way corridor conducting soil boring activities to help ensure foundations will provide adequate stability for transmission structures. The soil boring process involves using heavy equipment to drill holes, sample the soil, and assess its makeup. The holes will be refilled.

Thank you for your patience as improvements to the electric grid continue.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

UPCOMING WORK

(Anticipated Schedule)

Soil Boring Activities:
Late May – Early July 2026

Construction Activities:
Early 2027 – Early 2028

Restoration Begins: February 2028
