Preconstruction activities for Phase 4 are expected to begin in late August 2025, followed by construction. During this timeframe, you may notice our contractors in and around the right of way installing construction entrances and delivering equipment. During construction, there may be overnight intermittent lane closures on I-85. More details will be communicated when traffic impacts occur. Additionally, our forestry team will be working to clear trees in and outside of the right of way corridor.

Dominion Energy is dedicated to working safely and courteously in your community. Thank you for your patience and understanding as we work to power your every day.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.
