## Tarboro to Parmele 115 kV Electric Transmission Line Rebuild Project

At Dominion Energy, we are committed to providing safe, reliable, and affordable electricity to the communities we serve. You are receiving this postcard because we are preparing to rebuild an aging 115 kilovolt (kV) electric transmission line between our Tarboro and Parmele substations in the counties of Edgecombe and Pitt, North Carolina.

TO LEARN  
MORE

After sixty years of reliable service, the transmission structures and related components on the 15.7-mile line are at the end of their service life. Rebuilding this line will ensure safe and reliable service for decades to come.

Preconstruction activities, including right-of-way vegetation management and forestry surveying, will begin this fall. Later this year, we will install access roads and lay wooden mats to safely reach structures.

Your electric service is not expected to be interrupted as a result of this project. Thank you for your patience and understanding as we complete this important reliability project.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at [powerlines101.dominionenergy.com](https://powerlines101.dominionenergy.com).
