

Welcome To The Meeting!

We're Glad You're Here!

Technology Boulevard 230 kV Electric Transmission Project

**Dominion
Energy®**

Powering Your Every Day.™

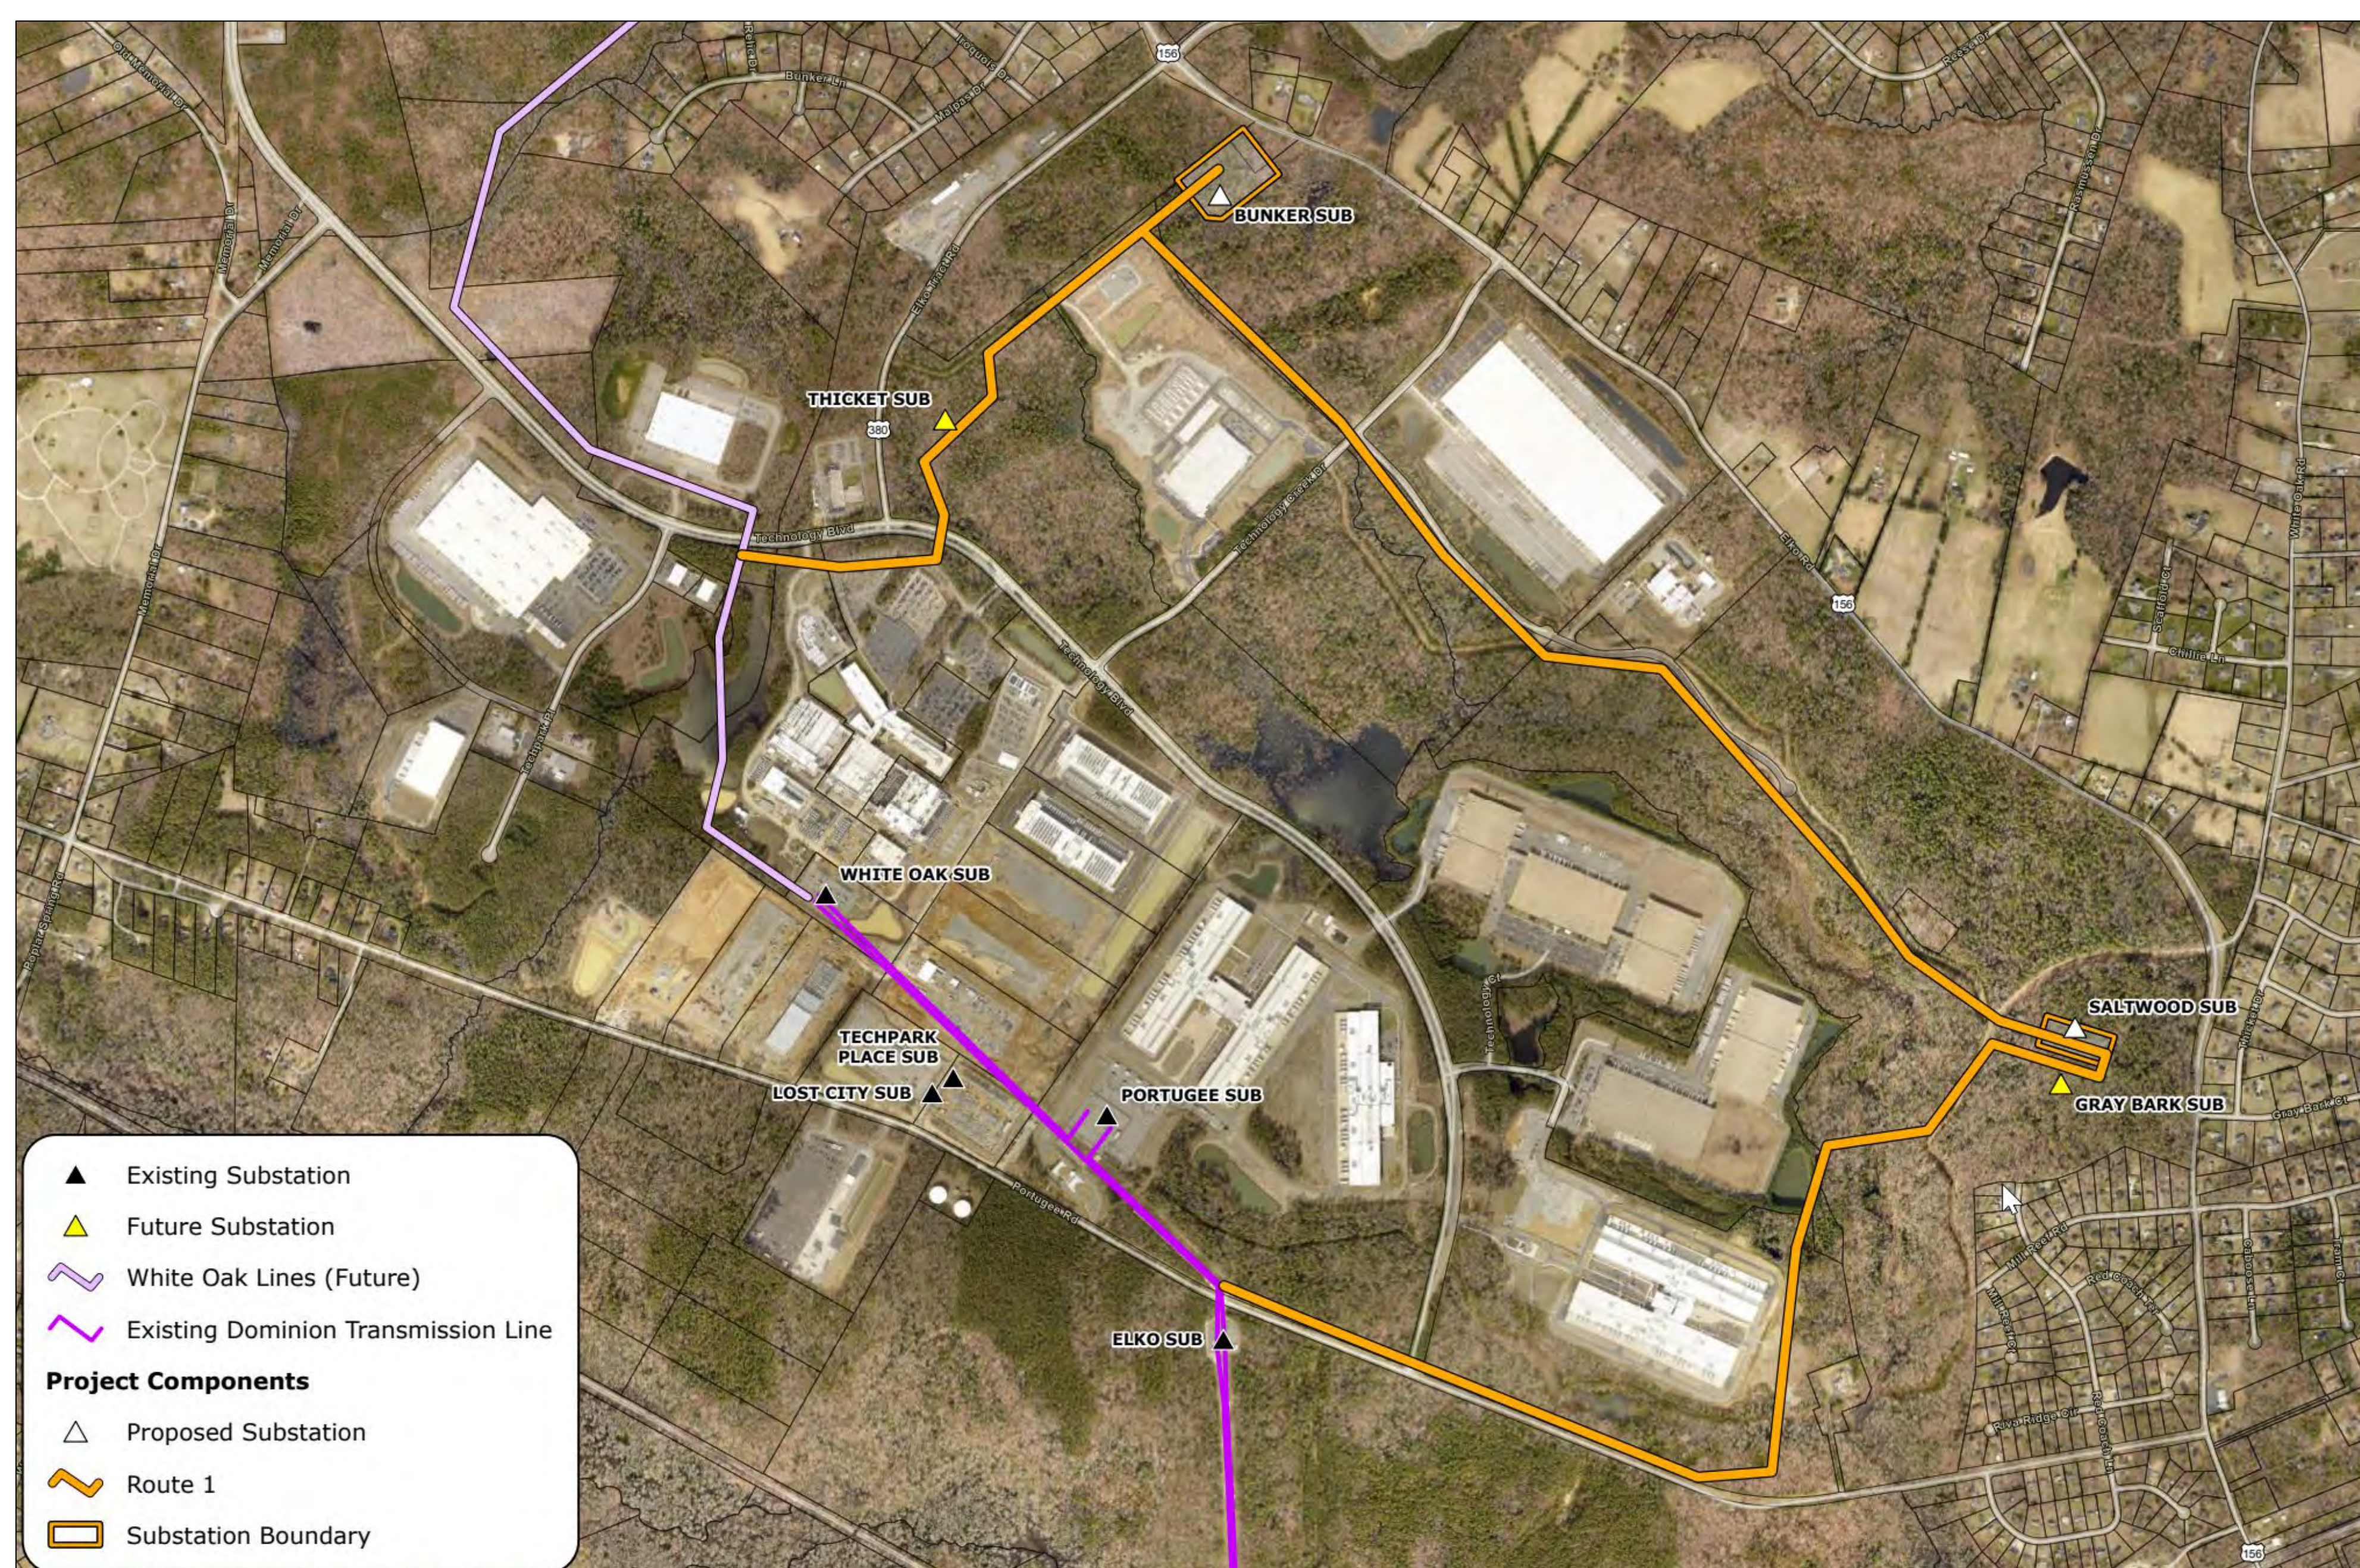

Project Overview

Technology Boulevard 230 kV Electric Transmission Project

To support recent growth within the White Oak Technology Park, a new double-circuit 230 kilovolt (kV) electric transmission source is needed to meet the new power needs, maintain federal reliability rules, and keep the grid operating efficiently.

The proposed electric transmission line will connect two existing lines within the technology park and will not cross residential properties.
