## **Tributary 230 kV Electric Transmission Line Rebuild Project**

Dear Neighbor,

At Dominion Energy, we provide the reliable, affordable, and increasingly clean energy that powers your every day. We would like to give you an important update about the Tributary 230 kV Electric Transmission Line Rebuild Project.

As a reminder, this project was needed to meet the area's growing energy needs, continue reliable electric service and maintain compliance with federal reliability standards. We filed an application with the Virginia State Corporation Commission (SCC) on October 1, 2024. In the application, we proposed four routes within the study area located in Stafford County, Virginia. **On June 30, 2025, the SCC issued a final order and approved Route 2 (blue) for construction.**

Our team would like to thank each community member who participated in the project planning process. Planning will continue through the remainder of 2025 as we prepare for construction. Preconstruction activity is expected to begin early 2026, with anticipated construction completion by late summer 2027. Our commitment to community engagement will continue through the remaining phases of the project. Please do not hesitate to reach out to our team with questions.

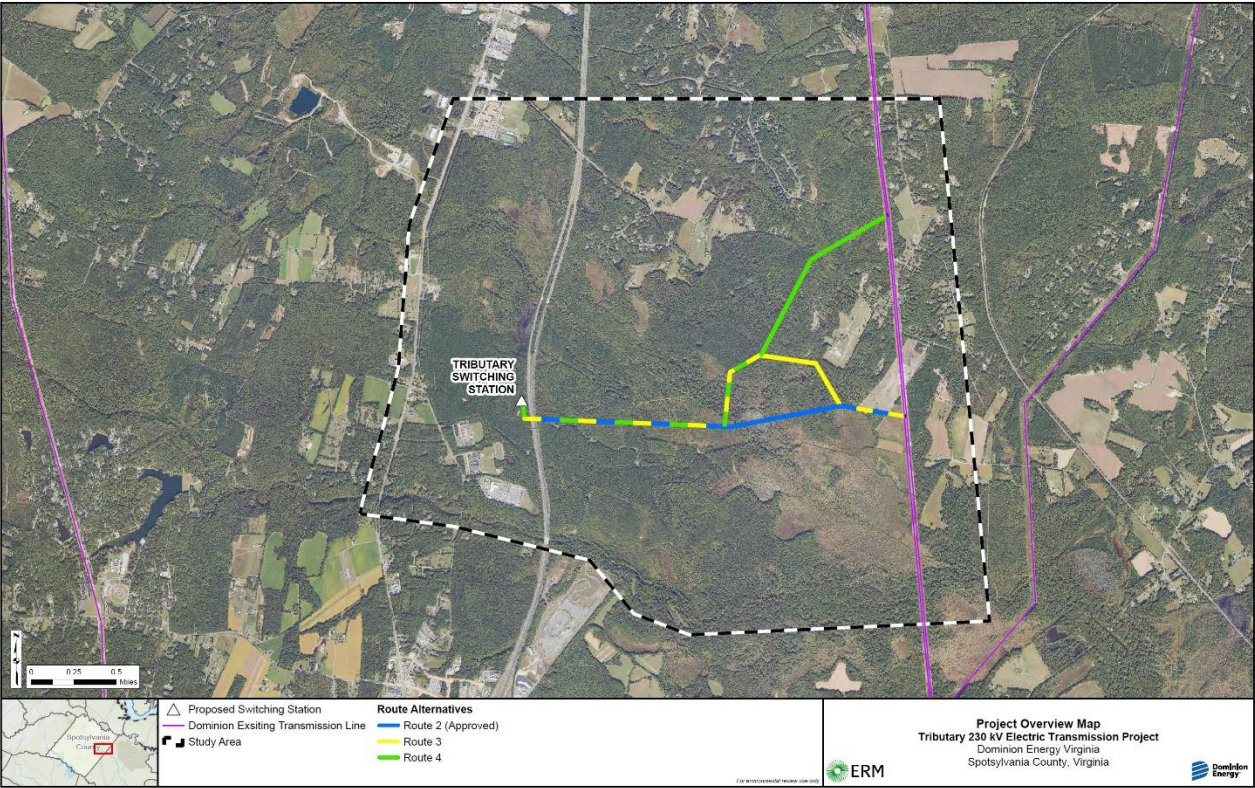

Visit our website [DominionEnergy.com/tributary](https://DominionEnergy.com/tributary) to view our filed SCC application, project documents, along with the final order and updated interactive route map – *MapChat by ERM*. You can also contact our project team by email at [powerline@dominionenergy.com](mailto:powerline@dominionenergy.com) or by phone at 888-291-0190. Thank you for your understanding while we plan for long-term reliability investments in your community.

Sincerely,

The Electric Transmission Project Team
