DON'T FORGET to join us at our Community Meeting

West Creek 230kV Electric Transmission Project

At Dominion Energy, we are committed to providing the reliable, affordable and increasingly clean energy that powers your every day. As previously announced, Dominion Energy is proposing new electric infrastructure. This project will ease the load that serves Goochland and Henrico counties and support other projects. This project will require new right of way. While no routes have been finalized; preliminary routes have been identified. Ultimately, only one route will be constructed.

As a reminder, you are invited to a community meeting on **Thursday, December 4, from 1–3 p.m. or 5–7 p.m.** Please attend either session at your convenience. Our subject matter experts will be available to answer your questions and photo simulation boards will be on display. There will be no formal presentation. Your continued participation and feedback are important in developing this project.

Please continue to visit the project website as we update our preliminary route maps. We welcome you to explore the West Creek Interactive Map. This tool allows you to:

- Use the address search to see locations that matter to you
- Examine preliminary routes
- View proposed infrastructure design and locations

(The routes shown in the interactive map are conceptual and subject to change.)

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.
