West Creek 230 kV Electric Transmission Project and Community Meeting

Dear Neighbor,

At Dominion Energy, we are committed to providing the reliable, affordable, and increasingly clean energy that powers your every day. New electric infrastructure is needed to ease the load on the local distribution network serving Goochland and Henrico counties and to support recently announced development projects. As such, the proposed West Creek 230 Kilovolt (kV) Electric Transmission Project will meet the continued needs of your region and maintain reliable electric service.

This project proposes the following key components:

1. A new substation to reinforce the electric distribution network.
2. A new, double-circuit 230 kV transmission line and right of way corridor to connect the new substation to the existing electric transmission grid.

The project is currently in the conceptual stage and the team is reviewing all electrical solutions within the project study area [see enclosure]. Your early involvement in this process is critical. As you know, public engagement is a key part of electric transmission project planning. You are invited to a community meeting to provide input on the new right of way and potential routes:

Community Meeting Details

Thursday, December 4, 2025

1-3 p.m. or 5-7 p.m.

Residence Inn – Short Pump at the Notch
1800 Wilkes Ridge Circle
Richmond, VA 23233

For your convenience, there are two sessions offered. During each session, you can review the preliminary routing options, learn more about the project and speak with team members. There will be no formal presentation.

After applying your feedback and evaluating all routing options, we will file an application with the Virginia State Corporation Commission (SCC) with one proposed route and alternatives. If approved, the SCC will determine which one route will be selected for us to construct.

Dominion Energy Virginia
Electric Transmission
5000 Dominion Boulevard
Glen Allen, VA 23060

More information on the project will be available in the coming weeks. In the meantime, you can view information about the project on our website, DominionEnergy.com/WestCreek. You can also contact our project team by email at powerline@dominionenergy.com or by phone at 888-291-0190.

Thank you for helping us plan for long-term reliability investments in your community.

Sincerely,

A handwritten signature in black ink that reads "Janae Johnson".
