Western Chesterfield 230 kV Electric Transmission Improvement Project

Dear Neighbor,

Dominion Energy provides the reliable, affordable, and increasingly clean energy that powers your every day. This letter provides you with an important update about the Western Chesterfield 230 kV Electric Transmission Improvement Project.

As a reminder, this project will help meet Chesterfield County's growing energy needs, continue reliable electric service and maintain compliance with federal reliability standards. An application was filed with the Virginia State Corporation Commission (SCC) on April 24, 2025. In the application, three routes were proposed within the study area located in Chesterfield County, Virginia. **On February 9, 2026, the SCC issued a final order and approved Route 3B for construction.**

Many thanks to each community member who gave the project team feedback and insight about the area. Our crews will work to prepare the area for construction through fall 2026. Pre-construction activity is expected to last from late 2026, through summer 2027. Community engagement will continue through the remaining phases of the project. Please do not hesitate to reach out to the Electric Transmission Project team with questions.

Please visit our website, DominionEnergy.com/westernchesterfieldET, for more detailed project information. There you can find our filed SCC application, project documents, the SCC's final order and an updated interactive mapping tool – *GeoVoice*. You can also contact our project team by email at powerline@dominionenergy.com or by phone at 888-291-0190. Thank you for your understanding while we plan for long-term reliability investments in your community.

Sincerely,

The Electric Transmission Project Team
