We are working in your community

White Oak Electric Transmission Project

Dominion Energy is committed to providing the reliable, affordable, and increasingly clean energy that powers your every day. We are reaching out to you to inform you of some upcoming helicopter work that will result in temporary traffic impacts.

In October 2026, a non-Dominion Energy helicopter will install transmission lines on the transmission poles at Old Williamsburg Road in Henrico, Virginia. This work will support the White Oak Electric Transmission Project.

To ensure everyone's safety, temporary traffic interruptions will occur near the 3300 block of Old Williamsburg Road and Mile Marker 200 on the westbound and eastbound lanes of I-64, including the I-295 North to I-64 East interchange. Traffic delays are expected to be less than five minutes at a time. Flaggers will be in place on Old Williamsburg Road to conduct brief traffic stops as needed, and a slow roll will be implemented on I-64 and the I-295 North to I-64 East interchange. There will be posted speed limits and traffic control measures in place to direct motorists. Helicopter work will occur on weekdays in October between 9:30 a.m. and 3:00 p.m. Crews will be working through the weekend to ensure the project stays on schedule; however, traffic will not be impacted on Saturdays and Sundays.

For our neighbors who reside near the work zone – please be reminded to remain outside the right of way. Safety is our highest priority, and this is an active construction zone.

Flights are weather-dependent and subject to change. Your patience is appreciated while this work is completed as quickly and efficiently as possible. Please do not hesitate to contact us if you have questions.
