# Investing In Your Community Wishing Star Substation

At Dominion Energy, we are committed to providing safe, reliable, and increasingly sustainable energy to our customers. Loudoun County has grown exponentially, and with this growth comes the need for additional energy infrastructure. As such, we are moving forward with a series of projects designed to address those growing energy needs.

The Wishing Star to Mars transmission line route was filed with the State Corporation Commission in October 2022. As part of this project, we will need to construct the Wishing Star substation just west of Arcola Mills Drive. Our zoning applications for the Wishing Star substation (ZCPA-2022-0009, CMPT-2022-0010, CMPT-2022-0011, SPEX-2022-0047, and SPMI-2022-0018) are currently being reviewed by county staff. Public hearings for the Wishing Star substation are expected late spring/early summer.

We value your input and would like to invite you to a public meeting for the Wishing Star substation. At the meeting you will learn more about the project and have the option to talk directly to project team members.

At Dominion Energy, we are committed to working in the public's best interest. We work with county, state, and community leaders as we plan and propose new energy infrastructure to address the demands of Northern Virginia's increased demand for energy.

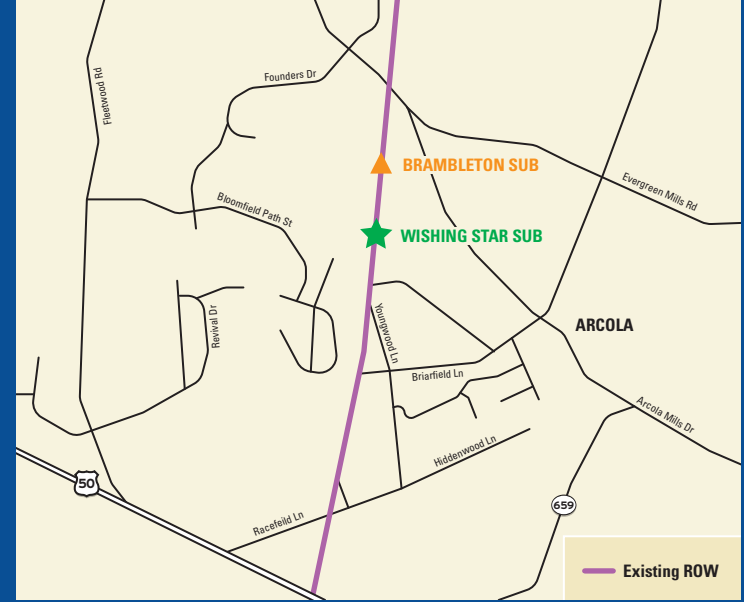

Please know we are dedicated to working safely and courteously in your community, and we will keep you updated on our progress.
