Wishing Star-Mars Transmission Line and Substation Project

At Dominion Energy, we are committed to providing the latest information on projects in the communities we serve. You are receiving this postcard to update you on the Wishing Star to Mars Transmission Line and Substation Project. In October 2022, we filed an application with the Virginia State Corporation Commission (SCC) to construct a new 500 kV/230 kV electric transmission line and two new substations in eastern Loudoun County. In April 2023, the SCC issued its Final Order approving the project. This new infrastructure will meet the growing demand for energy in Northern Virginia and improve area electric reliability.

To learn more about this project, we invite you to attend a pre-construction meeting on February 29, 2024. There is no formal presentation, so feel free to drop by from 5pm to 7pm to ask our team members questions and learn more. Pre-construction activities are currently underway. Pending final approvals, construction is scheduled to start in March 2024. We expect to complete construction in late 2025, with restoration activities extending into 2026.

Your electric service is not expected to be interrupted due to this project. Thank you for your patience and understanding.
