## Yadkin-Fentress 500 kV Electric Transmission Project

At Dominion Energy, we provide the reliable, affordable, and increasingly clean energy that powers your every day. We are replacing 13.5 miles of an existing 500 kilovolt (kV) transmission line with two 500 kV lines between our Yadkin and Fentress substations in the City of Chesapeake, Virginia. This project will maintain reliability of the transmission system and integrate new electric generation with the grid.

Phase 2 of the project, between Appaloosa Trail and Holmes Trail, begins this summer. New foundations and galvanized steel monopoles will be installed. The new wires will be installed with the help of a helicopter. We expect to finish Phase 2 construction in spring 2026, followed by right of way restoration.

To learn more about this project, we invite you to scan the QR code to access GeoVoice, our structure comparison tool.

We are committed to working safely and courteously in your community. Thank you for your patience.
