# Rehabilitation efforts continue in your community

## Yadkin-Fentress 500 kV Electric Transmission Project

At Dominion Energy, we provide the reliable, affordable, and increasingly clean energy that powers your every day. 13.5 miles of an existing 500 kilovolt (kV) transmission line is currently being replaced with two 500 kV lines between our

Yadkin and Fentress substations in the City of Chesapeake, Virginia. This project will maintain reliability of the transmission system and serve customers' growing energy needs.

Phase 1 construction activities have been successfully completed, and as weather allows, crews will continue to rehabilitate the right of way this winter and spring. This includes restoring property fences, repairing yards and neighborhood roads, and stabilizing the soil. Crews may perform minor grading in areas where access matting was removed. Seasonally appropriate perennial grass seed mixtures will be planted and covered in straw. The straw will protect the seed and stabilize the soil. Until mature vegetation is established, there may be some imperfections in residential yards. It may take up to a year for any high spots or depressions to level out.

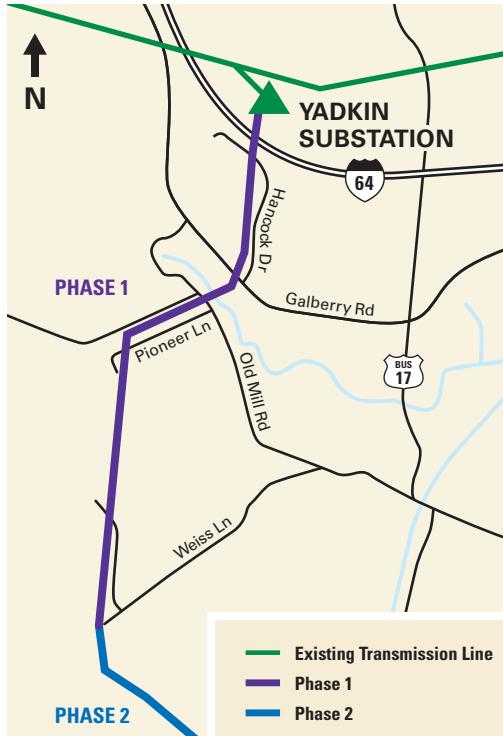

Please do not remove sediment controls measures, including silt fences and silt socks, as they prevent run-off. Through spring 2026, you may notice crews periodically inspecting the soil stabilization and grass growth. If the right of way requires additional rehabilitation work, crews will complete that in summer 2026.

Thank you for your patience as we complete work in your community.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at [powerlines101.dominionenergy.com](http://powerlines101.dominionenergy.com).

## REHABILITATION CONTINUES IN PHASE 1

(Yadkin Substation – Weiss Lane)

Winter – spring 2026

Continue Rehabilitating the Right of Way  
Finish Repairs on Pioneer Lane

Spring – summer 2026

Ongoing Right of Way Inspections

Schedule is subject to change pending weather, site conditions, and progress.
