We are working in your community

Yadkin-Fentress 500 kV Electric Transmission Project

At Dominion Energy, we provide the reliable, affordable, and increasingly clean energy that powers your every day. You are receiving this postcard to update you on the Yadkin to Fentress 500 Kilovolt (kV) Project, which will maintain electric reliability and serve customers' growing energy needs.

After surveying the electric right of way in 2025, several underground utility conflicts were identified between Amberdale Drive and Fentress Loop. The utilities were field-verified to be in different locations than documented.

Because these utilities are co-located in the existing 235-foot-wide right of way, the electrical structures must shift slightly from the planned locations in the easement. The section with minor shifts is shown in the adjacent map. Revised locations are staked in the field. Foundation installation is expected to begin within a few weeks.

To support this project, vegetation inside and outside the right of way corridor may need to be removed. In the coming weeks, you may be contacted by a Dominion Energy forester to coordinate necessary vegetation removal in your area or on your property. Once the lines are energized, the vegetation will be maintained to proactively minimize the risk of potential power outages.

Thank you for your patience as work is completed in your community.

This map is intended to serve as a representation of the project area and is not intended for detailed engineering purposes.

Protecting the grid against natural and man-made acts is a top priority. You can learn more about our commitment to safety at powerlines101.dominionenergy.com.

CONSTRUCTION TIMELINE

Late February – August 2026

Foundation installation

April – August 2026

Structure installation

May – September 2026

Wire installation

Fall 2026

Right of way restoration begins

Schedule is subject to change pending weather and progress. Upon completion, we will restore the right of way.
